Line à Int. Country ID

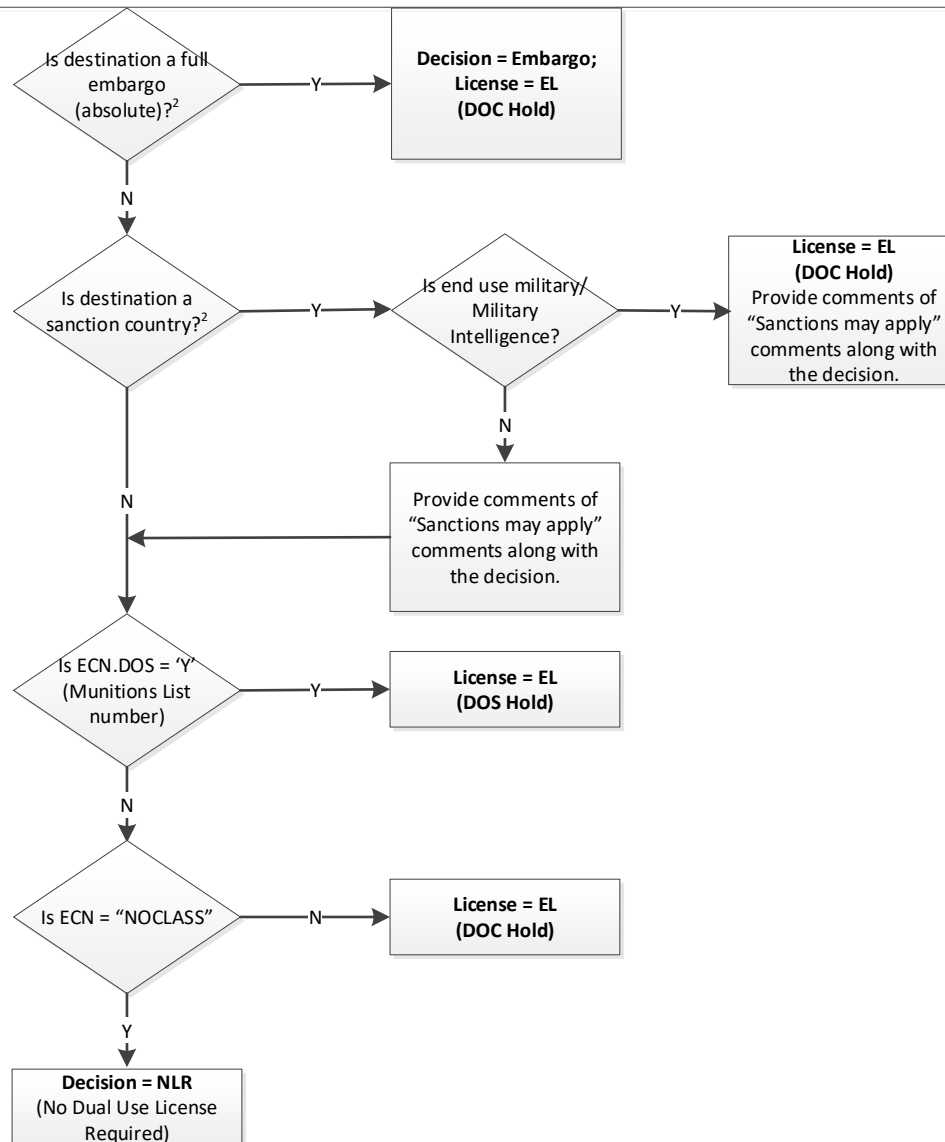

#### Country of Destination – Fields Used

Header à CUD  
Header à End User  
Header à Shipto

Line à CUD  
Line à Shipto

## China (CN) Export Controls - ECN and ML Controls (Global Trade Content) - Ver. 14.5.6

### Notes:

\* For China, we recommend that the customer performs both ECN (Dual Use Goods) Based and HS Based Export Controls because for certain types of items, CN captures the controls at the HS level.

1. ECN.DOS flag will be set to Y for all the items classified under the Military Goods List.

2. Absolute Embargo is captured in the LCS\_ABSOLUTE\_EMBARGO table (the ABSOLUTE flag will be set to Y.)

3. The sanctions are also captured in the LCS\_ABSOLUTE\_EMBARGO table (the ABSOLUTE flag will be set to N.)
